*Europe's longest running
Oric Magazine*

Number 67

March 1993

HELLO AND WELCOME TO THE MARCH AND HOPEFULLY THE SPRING ISSUE.

DATELINE - SATURDAY FEBRUARY 13th.

YES I AM TYPING THE EDITORIAL UP EXTRA EARLY THIS TIME. THE REASON IS THAT A GREAT EXPERIENCE HAS BEFALLEN ME. I HAVE SEEN THE SUN! IT IS THE FIRST TIME THIS MONTH AND BOY DOES IT PERK YOU UP!

AFTER OVER 3 MONTHS OF HARD SLOG KEEPING 'ORIC' MATTERS GOING - I THINK I HAVE FINALLY BROKEN THE BACK OF THE BACKLOG (IS THAT BAD ENGLISH MR.BOLTON - I CAN FEEL THAT CAME FROM HERE!).

OVER THE LAST TWO DAYS I HAVE BEEN DOING MY OWN THING ON THE ATMOS; NAMELY:- UPDATING MY SOFTWARE LIST (NEARLY 1100 FILES TO DATE), PLAYING ABOUT WITH SOME OF THE SOFTWARE ON OLD CEO DISCS, LOOKING FURTHER AT SOME OF HARRY PETERS' UTILITIES, LISTENING TO THE INTRODUCTION DEMO (SUPER!) TO JONATHAN BRISTOW'S NEW MUSICAL EDITOR CALLED 'SONIX' (WHERE IS THAT HEDGEHOG?), PLAYING A VERSION OF 'AWARI' FROM 'LANDSCAPE' WITH SYNTHESISED SOUNDS A LA 'VOTRAX', CHECKING OUT CONTROL CODES ON AN 'NEC' PRINTER, AND OF COURSE PLAYING 'DONT PANIC'.

MY COMFORT OVER THE WINTER HAS SADLY DISAPPEARED FROM THE BOOKSTALLS - NO NOT THE 'PLAYBOY' MAGAZINE,BUT THE 'GOLD C.D' MAGAZINE - A CHEAP WAY TO ADD TO THE OLD C.D. COLLECTION. STILL THERE IS ANOTHER SOUL C.D. MAG. DUE OUT AGAIN SHORTLY AND MEANWHILE I'M TUNED TO BOB HARRIS ON GOOD OLD RADIO ONE. BOB SAYS THAT HE WILL SHORTLY BE PLAYING A RE-ISSUED SONG FROM 'THE ELECTRIC PRUNES'. AH! THE DAYS OF FLOWER POWER AND PSYCHADELIA. IT HAS JUST GOT TO BE THE FAMED 'I HAD TOO MUCH TO DREAM LAST NIGHT'. I'LL DIG OUT MY ORIGINAL 45 AND CAN WIND THE KIDS UP WHEN IT'S A HIT!

ANYWAY - ENOUGH FRIVOLITY,AND THAT'S THE END OF THIS ISSUE UNLESS I GET SOME WORK DONE.

BY THE WAY; I HAVE JUST HAD A NICE LITTLE CHAT WITH JOHN HURLEY. JOHN HAS BEEN GLANCING THROUGH BACK ISSUES OF 'O.U.M' AND OTHER ORIC MAGS. HE SAYS IT IS SURPRISING HOW MANY INTERESTING ITEMS HE HAD OVERLOOKED. I SUPPOSE JOHN THAT CERTAIN THINGS WERE NOT RELEVANT TO YOUR COMPUTING AT THE TIME AND NOW ARE. WHAT A BLESSING THE 'OUM' AND 'CEO' INDEXES ARE!

NOW ABOUT THIS POSITION YOU WOULD EXPECT THE INDEX - WELL TOUGH; IT IS ON THE BACK PAGE!

INSTEAD OUR 'MESSAGES' SECTION HAS PROVED POPULAR (EVEN THE C.E.O NOW DO ONE), AND SO HERE WE GO!

MESSAGE TO DAVID MACKENZIE FROM ROBERT CRISP

THANKS FOR YOUR SUGGESTIONS REGARDING MONITOR CONNECTIONS AS PER O.U.M # 66. LIKE YOU I ALSO HAD A BBC MICRO AND ALSO FOUND IT SHORT OF MEMORY. I LIKED THE BBC ASSEMBLER,BUT IT WAS A PITY ABOUT THE MEMORY.

MESSAGE TO DAVE DICK FROM BRIAN KIDD

I DON'T THINK MUCH OF YOUR MENU SYSTEMS FOR O.U.M DISCS - I'LL DO THEM IN FUTURE - JUST TELL ME WHAT WILL BE ON THEM.

MESSAGE TO BRIAN KIDD FROM DAVE DICK

SOD OFF!

NO WAY AM I GOING TO WRITE TO YOU AND THEN WAIT FOR A REPLY. A LOT OF THE PROGRAMS ON THE DISC ARE LAST MINUTE ADDITIONS.

I HAVE HAD NO COMPLAINTS FROM ANYONE ELSE. TO BE HONEST IF I GO TO A RESTAURANT THEN THE THING THAT MAKES MY NIGHT IS THE FOOD NOT THE MENU!

AS YOU RECIEVE YOUR DISC AS 3.5" THEN YOU HAVE TO TYPE A WORD IN TO GO FROM ONE MENU TO ANOTHER AS THIS DISC IS COPIED FROM THE 3" MASTER,WHICH IS SPLIT BETWEEN 2 SIDES OF A DISC.

P.S. MY BIGGEST PROBLEM IS BUGGED PROGRAMS,AND WE ALL KNOW WHO PENNED 'FUNPARK'.

P.S.S. - APOLOGIES IF I SOUND NARKED,BUT I AM ALWAYS BLUNT. BY THE WAY I LIKE 'FUNPARK' AND SO DO THE KIDS.

P.S.S.S - I THINK THERE IS ALSO A BUG IN YOUR 'SUPER REVERSE' LISTING. I WILL DIG OUT THE LETTER.

MESSAGE TO JONATHAN BRISTOW FROM PAUL HUTTON

I WAS IMPRESSED WITH YOUR 'GO SNOW' WINTER SCENE ,WHICH WAS ON THE SECOND O.U. M DISC, PARTICULARLY THE EFFECT OF THE SNOW FALLING OFF THE LOG CABIN ROOF. IT GOES TO NUMBER 2 IN MY CHART OF INTERESTING SCREENS BEHIND THAT OF THE 'GIRL SCREEN',WHICH WAS ON THE WINTER '92 C.E.O DISK!

NEWS NEWS NEWS NEWS
 T H E 1 9 9 3 O R I C M E E T

THE VENUE IS BOOKED. BE THERE OR BE SQUARE!

OUR SPECIAL ANNIVERSARY ORIC MEET WILL TAKE PLACE AT THE 'RIVETS SPORTS AND SPECIAL CLUB' IN AYLESBURY, ON SATURDAY JULY 17 th. 1993. BATTLE COMMENCES AT 10.00 a.m. AND WE SHUT UP SHOP AT 6. p.m. THERE WILL OF COURSE BE MORE ORIC MANIA, A BARBECUE AND A SELECTION OF MUSIC BACK AT THE EDITOR'S PLACE IN THE EVENING.

TICKETS FOR THE MEET ARE JUST 2 pounds. IF YOU ARE COMING THEN PLEASE GET YOUR TICKETS A.S.A.P AS WE HAVE TO PAY FOR THE VENUE IN ADVANCE.
 IF YOU WANT TO CONTRIBUTE WITH DEMOS etc. THEN PLEASE LET ME KNOW.

MIND WADNEZ

COMING SOON TO A SCREEN NEAR YOU WILL BE THE LATEST EPIC FROM ARNT ERIK ISAKSEN. IT WILL BE DISC BASED (SEDORIC). IT WILL INCLUDE SOUNDS/MUSIC FROM J. B's 'MUSED' AND COULD HAVE OVER 50 SCREENS.

WHAT'S THE GAME ABOUT? I DON'T KNOW!

WATCH THIS SPACE!

IT WILL BE COMPATIBLE WITH THE 'ALTAI' AND THE 'DKTRONICS' JOYSTICK INTERFACES.

MIDI PORT

WITH REGARD TO THE 'FAMED' TELESTRAT MIDI PORT, TREVOR SHAW HAS DESIGNED A MIDI INTERFACE FOR THE ORIC 1/ATMOS, BUT HAS NOT YET FOUND TIME TO BUILD AND TEST IT. JONATHAN BRISTOW IS KEEN TO HAVE IT AND HAS AGREED TO WRITE THE SOFTWARE. IF THE TELESTRAT REALLY DOES HAVE A BUILT IN MIDI PORT, INCLUDING THE ELECTRONICS TO DRIVE IT, THEN IT WOULD MAKE SENSE FOR ANY SOFTWARE TO BE COMPATIBLE WITH ALL 3 MACHINES. WITH THIS IN MIND TREVOR MAY HAVE TO MODIFY HIS DESIGN.

TREVOR ASKS IF SOMEONE CAN LET HIM HAVE A COPY OF THE CIRCUIT DIAGRAM OF THE TELESTRAT MIDI INTERFACE, OR AT LEAST TELL HIM WHICH CHIP IS USED AND WHERE IN MEMORY IT IS MAPPED TO?

IF NOT PERHAPS SOME KIND TELESTRAT USER COULD LET TREVOR HAVE ACCESS TO THE MACHINE TO FIND OUT FOR HIMSELF,

HIS DESIGN UTILISES A 6850 ACIA CHIP AND IS MAPPED TO #378 - #379 IN PAGE 3.
 COME ON PLEASE HELP OUT!

SONIX

JONATHAN BRISTOW'S NEW MUSICAL EDITOR 'SONIX' IS WELL INTO THE PROGRAMMING STAGE. THERE WILL BE ADJUSTABLE BAR GRAPH, WHICH WILL DENOTE PITCH, NOISE AND VOLUME.

ZEBULON FOR THE AMIGA

THE GRANDCHILDREN OF TIM PHOENIX ARE TOTALLY HOOKED ON 'ZEBULON'. THE TROUBLE IS THAT AT THEIR HOUSE THEY HAVE AN 'AMIGA'. TIM WANTS AN 'AMIGA' VERSION OF 'ZEBULON' SO THAT HE CAN GET TO USE HIS ATMOS FOR 'TETRIX'. JONATHAN BRISTOW SAYS NO WAY JOSE!

A NEW NUMBER ONE!

YES FOLKS! I CAN CONFIRM THAT AS WELL AS WHITNEY HOUSTON BEING KNOCKED OFF (THE POP MUSIC CHARTS); 'TETRIX' HAS SLIPPED FROM POLE POSITION AS CURRENT ORIC TOP SELLER. IN ONE PERIOD OF 24 HOURS I RECEIVED 4 ORDERS FOR IT ON DISC. I HAVE STILL TO PRODUCE A CASSETTE VERSION. IF I GET A MINUTE AND DO ONE THEN YOU WILL READ IT ON THE BACK PAGE.

READERS LETTERS READERS LETTERS READERS LETTERS

DEAR DAVE,

I SPENT MANY ABSORBING HOURS ON 'ZEBULON' OVER XMAS, AND FINALLY COMPLETED IT. I THINK IT'S GREAT! GOOD GRAPHICS AND PLENTY OF INTERESTING FEATURES. I SEE JONATHAN BRISTOW HAS YET ANOTHER ONE ("DON'T PANIC") ALREADY OUT. HE CERTAINLY IS PROLIFIC.

I WAS VERY INTERESTED TO SEE THE LATEST O.U.M COVER (JAN'93). IT CERTAINLY DOESN'T FEEL 10 YEARS SINCE I FIRST STARTED TO OGLE THE WONDERFUL ORIC-1 IN 'WHICH MICRO' AND 'PERSONAL COMPUTER WORLD'; AND PAINSTAKINGLY SAVED UP MY PRINCELY 130 POUNDS. IT MUST ALSO BE JUST ABOUT 10 YEARS SINCE '1JK' STARTED WORK ON 'ZORGONS REVENGE' - FUNNY HOW NO-ONE EVER REALLY MANAGED TO IMPROVE ON THE GRAPHICS IN THAT CLASSIC IN THE DECADE SINCE.

- ALISTAIR WAY (CAMBRIDGE)

DEAR ALI,

'ZEBULON' IS CERTAINLY PROVING TO BE POPULAR. 'DONT PANIC' HAS ME TOTALLY HOOKED AND TO PROVE HOW BUSY JONATHAN IS, I HAVE RECENTLY RECIEVED A DEMO VERSION OF 'SONIX' - A MUSICAL EDITOR AND THE FOLLOW-UP TO 'MUSED'.

IF EARLY INDICATIONS ARE ANYTHING TO GO BY, THEN THIS COULD BE TREMENDOUS. THE SAMPLE MUSIC IS EXCELLENT. IT STARTS FROM NOTHING AND BUILDS AND BUILDS; ALL THE WHILE BRINGING IN OTHER CHANNELS AND INSTRUMENTS. TO GET THE FULL EFFECT YOU HAVE TO PLAY IT THROUGH AN EXTERNAL SPEAKER. THE SCREEN DURING THE DEMO IS VERY NICE. A SCENIC VIEW AND 3 'PIPES' SHOW THE VOLUME OF EACH CHANNEL IN A SORT OF FLAME - LIKE EFFECT. IT WILL BE A COUPLE OF MONTHS BEFORE IT IS FULLY FINISHED.

- DAVE

DEAR DAVE,

AFTER READING YOUR REPLY TO MY LETTER IN O.U.M ISSUE 66, I HAD A LOOK THROUGH THE LISTING FOR THE RANDOM SET-UP AND FOUND IT. AFTER LOOKING AT IT FOR A WHILE I COULD NOT FIGURE OUT LINE 29060, WHICH READS: D2 INT(1+RND(1)*6), AND SO DELETED IT. LO AND BEHOLD THE PROGRAM NOW RUNS PERFECTLY. I ALSO RECIEVED SOME COMMUNICATION FROM BRIAN KIDD ON THE MATTER, FOR WHICH I AM GRATEFUL. PLEASE PASS ON MY THANKS.

- IAN BRADBURN (MIDDLESBOROUGH)

DEAR IAN,

GLAD THE PROBLEM IS SOLVED, AND I'M SURE BRIAN WILL BE PLEASED THAT HE HAS BEEN OF HELP. BRIAN HAS BEEN VERY BUSY WITH PROGRAMMING OF LATE AND I THINK WE COULD SEE SOME EXCELLENT SOFTWARE FROM HIM IN THE NEAR FUTURE. HIS 'FUNPARK' ON THE SECOND O.U.M DISC PROVES THAT HE HAS THE MAKINGS.

- DAVE

DEAR DAVE,

THANKS FOR O.U.M DISC NO.2.

I HAVEN'T HAD TIME TO DELVE INTO ALL THE PROGRAMMES, BUT FOUND THEM MOST INTERESTING. I LIKE THE 'ORIC' AND 'ATMOS' LOGOS VERY MUCH, BUT FOUND SOME OF THE DEMOS A BIT LONG WINDED.

- EDMUND WISNIEWSKI (HUDDERSFIELD)

DEAR EDMUND,

WELL WE CAN'T PLEASE EVERYONE, BUT I'M SURE THAT YOU'LL FIND A FEW THINGS OF INTEREST. THE 'LONG WINDED' DEMO MUST BE PART 3 OF THE SERIES ORIGINALLY LISTED IN 'ORIC COMPUTING' MAGAZINE. IF MY MEMORY SERVES ME RIGHT, THEN IT WAS STAN HOLDEN WHO FAITHFULLY TYPED IT UP. THE GOOD NEWS IS THAT THERE ARE OTHER PARTS FOR FUTURE DISCS! THOUGH IT IS SOMEWHAT LENGTHY; IT IS I FEEL A GOOD AID TO THOSE WHO ARE JUST GETTING INTO PROGRAMMING.

- DAVE

DEAR DAVE,

I THOUGHT THE FIRST O.U.M DISC WAS EXCELLENT, AS I THINK I'VE ALREADY MENTIONED. PARTICULAR FAVOURITES WITH THE KIDS ARE 'SOWEEK 2' AND 'ESCAPE'. I WAS ALSO PLEASED TO SEE THE ORIC DEMO PROGRAM ('SHOWING OFF'), AS I NEVER GOT AROUND TO TYPING IT IN FROM THE 'ORIC COMPUTING' MAGAZINE - SO THANKS TO WHOEVER WAS RESPONSIBLE. PERSONALLY I AM FINDING THE SPANISH LESSONS HELPFUL TOO (I 'DID' SPANISH AT SCHOOL, BUT CAN ONLY REMEMBER THE ODD BIT HERE AND THERE).

I THINK DISC 2 IS ALSO GOOD - THE ONLY DISAPPOINTMENT I SUPPOSE BEING 'ORIC CAD', SINCE I ALREADY HAVE A COPY, WHICH I CONVERTED FOR ORICDOS (ALTHOUGH I AM NOT SURE IT IS ENTIRELY BUG FREE!). 'LONE RAIDER' IS ANOTHER ONE POPULAR WITH THE KIDS, AND I GAME WHICH I HAD BEEN UNABLE TO SUCCESSFULLY CONVERT TO DISC, AND WHICH THEREFORE THE KIDS HAD NOT SEEN UNTIL NOW! SO THANKS TO EVERYONE WHO HAS BEEN INVOLVED IN PRODUCING THESE DISCS - I THINK THEY ARE AN EXCELLENT IDEA AND TREMENDOUSLY GOOD VALUE. I'LL TRY AND DIG A FEW THINGS OUT WHICH MIGHT BE OF USE FOR A FUTURE DISC.

- TREVOR SHAW (SALTBURN - BY - THE - SEA)

DEAR TREVOR,

WELL WE SEEM TO HAVE KEPT EVERYONE HAPPY. ONE MAN'S MEAT IS ANOTHER MAN'S POISON, BUT BY HAVING AS MANY PROGRAMS AS POSSIBLE OF DIFFERENT VARIETIES ON ONE DISC, WE APPEAR TO OF CATERED FOR EVERYONE. NO PERSON WHO TOOK THE FIRST DISC WROTE TO SAY THAT THEY DIDN'T WANT THE SECOND AND I THEREFORE ASSUME FROM THIS FACT AND THE MANY LETTERS THAT I GET THAT WE HAVE A SUCCESS ON OUR HANDS.

BEARING THIS IN MIND I AM ALREADY PREPARING THE THIRD OUM DISC FOR DESPATCH WITH THE MAY ISSUE OF O.U.M.

I THINK THEY ARE GOOD VALUE. 'ORIC-CAD' + OFFICIAL MANUAL WITH 'LONE RAIDER' AND OFFICIAL INLAY; EVEN WITHOUT THE OTHER PROGRAMS MUST BE A BARGAIN AT 3.50. ESPECIALLY AS MANY OF YOU ARE STILL PAYING AROUND 3 POUNDS JUST FOR A 'MAXELL' 3" DISC. I WAS TEMPTED TO DROP THE PRICE FOR 3.5" USERS, BUT TOOK INTO CONSIDERATION THE WORK INVOLVED IN TRANSFERRING AND ADAPTING MENUS.

- DAVE

READERS LETTERS - CONTINUED

DEAR DAVE,

I ENCLOSE A 3.5" DISK FORMATTED MSDOS 720K THAT CONTAINS THREE FILES:-

D65.EXE - A 6502 DISASSEMBLER THAT WORKS ON 'INTELEK' FILES.

D65FILE - THE COMMAND FILE FOR 6502 DISASSEMBLER.

ORICATH.ORG - THE ORIC ATMOS ROM IN AN 'INTELEK' FILE.

A65.EXE - PUBLIC DOMAIN 6502 ASSEMBLER.

A65.DOC - DOCUMENTATION FOR THE ABOVE AND SOME RELATED FILES.

I KNOW THAT THIS ISN'T AN ORIC PROGRAM, BUT I NEEDED LARGE SECTIONS OF THE ORIC ROM FOR A O/S OF MY OWN. IT'S QUICKER TO WRITE A CODE GENERATOR THAN TO TYPE THE LISTING IN BY HAND AS I AM A LAZY PERSON BY NATURE.

THE OUTPUT FROM 'D65' IS 'FILENAME.LST' AND CAN BE RENAMED TO 'FILENAME.ASM' AND FED TO THE PSUDDSAM 'A65' ASSEMBLER

'A65' IS A PUBLIC DOMAIN '6502' ASSEMBLER THAT USES A STRANGE SYNTAX, BUT IT HAS TWO GREAT ADVANTAGES - IT IS QUICK AND IT IS CHEAP!

I HOPE THAT YOU CAN FIND SOME OF THE USER GROUP WHO ARE INTERESTED IN THEM.

IF YOU KNOW SOME ONE WITH A CIRCUIT DIAGRAM FOR THE DISK CONTROLLER (ATMOS) THEN I WOULD LOVE A COPY. TA.

- DOUGLAS MALCOLM-BROWN (HARPENDEEN)

DEAR DOUGLAS,

I THANK YOU FOR THE DISC, WHICH I'M AFRAID I HAVEN'T GOT AROUND TO LOOKING AT YET, ALONG WITH A FEW OTHERS.

IF ANY READER WOULD LIKE A COPY OF THE PROGRAM ON 3.5" THEN WOULD THEY PLEASE SEND ME 5 x 24p STAMPS TO COVER THE COST OF A DISC AND POSTAGE.

A COPY OF THE CIRCUIT DIAGRAM SHOULD NOW BE WITH DOUGLAS.

- DAVE

DEAR DAVE,

YOU MAY RECALL OVER THE PHONE THAT I SAID I WAS LOOKING AT THE FIX FOR 'TRON'. THE ARTICLE WAS IN ISSUE 40. SHOULD YOU HAVE ANY REASON TO COMMUNICATE WITH OWE FRANSSEN COULD YOU PLEASE ASK HOW ONE CHANGES MEMORY LOCATION ADDRESSES AT #C8FD AND #C909 TO #CCD9 WHEN THEY ARE IN ROM AND NOT AVAILABLE TO THE USER.

I ENCLOSE A PRINT-OUT OF A BIORYTHMS PROGRAM AND IT MAY WELL BE THE ONE THAT ROB KIMBERLEY HAS BEEN HAVING PROBLEMS WITH. I HAVE GENERALLY TIDIED IT UP.

I HAVE TYPED IN THE 'SUPER REVERSE' PROGRAM FROM THE FEBRUARY D.U.M, BUT I DO SEEM TO BE HAVING TROUBLE WITH MAKING IT WORK WITHOUT CRASHING. THE PROBLEM THROWS UP LINE 262 FOLLOWING ENTRY OF NUMBERS LOWER THAN THE PREVIOUS NUMBER ENTERED. I HAVE ALSO HAD TO AMEND LINE 234 TO 'INPUT V\$' RATHER THAN 'GET V\$' AS WITH 'GET V\$' YOU CAN ONLY ENTER ONE KEY PRESS. IF MR. KIDD WOULD CARE TO ELABORATE FURTHER; THIS IS ONE OF THE SORT OF THINKING PROGRAMS I LIKE HAVING A GO AT. THE PRESENTATION IS VERY GOOD.

- JOHN HURLEY (YEOVIL)

DEAR JOHN,

I HAVE HAD NO CONTACT WITH OWE AND I BELIEVE HE IS NO LONGER AN ORIC USER. PERHAPS SOMEONE OUT THERE, WHO HAS USED HIS TRON FIX COULD POSSIBLY HELP OUT.

I THANK YOU FOR THE BID-RYTHM PROGRAM, WHICH IS NOT IN FACT THE ONE IN QUESTION. I HAVE RECENTLY HAD A NOTE FROM TREVOR SHAW REGARDING THE PROGRAM AND THIS IS REPRODUCED IN THE 'MESSAGES' SECTION.

REGARDING 'SUPER REVERSE'. IT WAS A RECIEVED JUST PRIOR TO GOING TO PRINT LAST TIME. I CHECKED IT LOADED. THOUGHT - "THIS IS BLOODY HARD!", BUT DIDN'T CHECK IT OUT FOR BUGS. APOLOGIES FROM ME.

PERHAPS MR. KIDD (BRIAN TO HIS FRIENDS, OR JUST MR. KIDD TO ME), PERHAPS THE WELSH WIZZARD COULD SORT THIS OUT.

BY THE WAY JOHN - THANKS FOR THE SEIKOSHA PRINTER PROGRAM. IT LOOKS VERY USEFUL. I HAVE BEEN GETTING TO GRIPS RECENTLY WITH CONTROL AND ESCAPE CODES ON BOB TERRY'S 'NEC' PRINTER, AND NOW FEEL AS THOUGH I SHOULD MAKE MORE USE OF THEM ON MY OWN 'SEIKOSHA'.

- DAVE

NOTE FROM THE EDITOR:

WELL THAT IS JUST A SMALL SELECTION FROM THE POSTBAG. VARIED IF NOTHING ELSE. I THINK TO REPRODUCE ALL YOUR LETTERS IN THE MAGAZINE WOULD OFTEN MEAN NO ROOM FOR ANYTHING ELSE. HOPEFULLY I HAVE REPLIED TO EVERYONE ELSE.

IT HAS BEEN A QUIET FEW HOURS TYPING THIS UP - ONLY 3 PHONE CALLS. GRAEME BURTON AND TIM COLGATE HAVE BOTH ORDERED "DON'T PANIC". NO DOUBT TRYING TO BEAT MY NEW HI-SCORE (I HAVE JUST TOPPED THE 3000 PT. MARK). THEN SOME BAD NEWS - JONATHAN 'DONT PANIC' BRISTOW ON THE PHONE!

HE DECIDED TO SEE ABOUT WRITING "DON'T PANIC 2", BUT FIRST DECIDED TO HAVE A QUICK GO AT THE ORIGINAL. ANYWAY NIGHT BECAME MORNING - NO NEW VERSION, BUT A NEW HI-SCORE. JONATHAN NOW BOASTS 3508 PTS.

HE DID THIS BY USING THE 'PREMO' SETTING AND STARTING AT LEVEL 7.

NOW THE QUESTION IS : WHAT CONSTITUTES A HI-SCORE. IS IT STARTING FROM LEVEL ONE, STARTING FROM ANY LEVEL, OR THAT SHOWN ON THE HI-SCORE TABLE. FOR IN THIS GAME IF YOU REACH A SCORE OF SAY 2000 PTS AND THEN LOSE HALF OF YOUR SCORE; THEN THE 2000 IS SHOWN AS THE HI-SCORE BECAUSE IT WAS ATTAINED. THIS COULD TURN INTO AN ARTICLE. MEANWHILE DON'T FORGET THAT LINES OF 3 CAN BE MADE VERTICALLY AND DIAGONALLY AS WELL AS HORIZONTALLY. THE DIAGONALS CAUGHT ME OUT. I HAD CLEARED A NICE TRIO AND LO AND BEHOLD, BUT SOME SHAPES (THE NEGATIVES) ROLLED DOWN AND MADE UP A NICE DIAGONAL LINE, THUS DEPRIVING ME OF SOME OF MY SCORE.

The Age of the Dinosaurs

So the Oric was launched on an unsuspecting world, some ten years ago. However some of us had already aquired a few battlescars a couple of years earlier from machines such as the Microtan 65. Tangerine advertised the Microtan as a computer for less than £70. For that price, plus VAT, you got a circuit board and a minimum selection of components, which was fine, if you could do without little luxuries like building and operating instructions, a keypad (keyboard) and power unit etc. After some fourteen hours work that ate a complete soldering iron bit and left me about £120 lighter, I actually had a working machine, running off a set of nicad pencell batteries !!

Now for the easy bit. All I had to do is to program it. So open the manual and Ye Gods !! look at all them weird numbers and labels !! What the heck do they all mean ?

The hexadecimal numbering system was strange at first. Remembering to count from "0" to "9" and then on to "A", "B" etc, up to "F" and then "10" took a little getting used too. At least, there are no complicated calculations and you only need to learn how to do it once. It's just a matter of getting into the habit.

The instructions appeared to be described in inspired gibberish. I looked up the word "operand" in a dictionary, which said "see opcode" so I looked that up and it said "see operand", so now I know what recursion is !!

Phutttttt !!

----- The next stage was to try to get some practical experience, so I copied a code listing as accurately as possible, into the machine. I bet you think that it had loads of bugs in it ??...Oh Ye of Little Faith !! You are quite wrong. What really happened ? Well I had just entered the last of several hundred bytes, when the nicad battery pack decided that it was bedtime and said "Bye bye" and the Microtan promptly crashed !!!!! Did I tell you that there was no cassette interface ? Yup ! it's all part of life's rich pattern !! So I entered a new instruction that invited it to go forth and multiply itself !! After that I bowed to the inevitable and added the expansion board and the power supply, which accounted for another soldering iron bit, not too mention another £150. Happy days !!

The next problem was that the manuals were written for people who understood all the buzz-words, which cut me out. It might have been easier if I had been able to join a computer club, however my commitments mean't very unsocial hours so I couldn't get to a club.

So, it was a case of DIY or nothing. I spent a fair bit of time while travelling, reading up on the 6502 Instruction Set and compiling my own brief description of how each instruction operated and what it did. Any instruction that was difficult to understand, was tried out on the Microtan.

The Light Dawns

It soon became obvious that the sixty odd instructions were in fact made up from a combination of a smaller number of fairly simple operations. It was only necessary to become familiar with that small collection of operations to have a key to all the programming facilities in the computer. For me, it is much easier to remember a small number of operations, than a much larger collection of labels and codes.

7

All languages, on the Oric, not just machine code, are simply products of that small collection of operations. Once I had got to grips with most of those operations, all I needed for programming, was a small crib card listing the Instruction Set, plus a few addresses and other useful bits of information.

I also found it a lot easier to write programs in terms of operations such as "fetching this" or "testing that" and "branching there" etc, which is why my programming is backed up by a fair amount of descriptive notes.

The Instruction Subset

----- The 6502 Instruction Subset published in the last article is simply an expanded version of part of my own listing of the full 6502 Instruction Set, which I use as part of a "crib card" set.

The subset published in the article, is by no means, the whole of the Instruction Set. There are still quite a few instructions, yet to be covered, as you will see if you compare it with the full 6502 Instruction Set, which can be found in many books and manuals, including those for the Oric.

If you look at it you will see that the subset has been subdivided into groups each containing a small set of instructions that are either similar in operation (eg.Branch Instructions), or they are related in some way (eg. Jump Instructions).

The subset is headed by three groups for the three main registers, Accumulator, Register "X" and Register "Y" and it is easy to see that the basic operations for these three are very similar. Hopefully, setting out the instruction set in this way, concentrating on the operations that can be done, will make it easier to use. You dont have to learn every label and code. Look them up in the subset, as and when you need them.

Crash Course

----- Hopefully, by now, you have more than enough in our small subset to try some practical experiments of your own. Do have a try, because you will learn far more that way, than you will ever learn, by simply reading about it. At the very worst, you may well crash the computer, but providing you have saved your work before you actually try it out, there is no harm in that and you only need to reload to try again. Anything new, seems difficult when you first try it. However, once you have tried a few simple experiments of your own and have managed to get some of them working, you will quickly find that it all becomes a lot easier. Sorting out a program fault (debugging) might seem difficult at first, but you will be surprised how much you can learn about programming in the process of finding and correcting your mistakes.

The golden rule, as I have said before, is to keep it small. It is far easier to write and debug a lot of short routines rather than one very long one. After all, once you know that each routine works and will do what you want it to do, you can then build up, by combining successful small routines, one by one, to make up larger routines, if you really need to.

Programming in any language, takes a little time to get it right. Dont worry if it does not work out first time. There are often several ways to get the right result and the software you write, is the best software you can have.

.....
"People who say it cant be done are often interrupted by people doing it"
(quote from "SAM Speaks")

AROUND THE WORLD IN 80 DAYS

THIS TRANSLATED 'NO MANS LAND' TITLE APPEARED ON A RECENT C.E.O DISK. IT IS A NICE LITTLE ADVENTURE WHERE YOU HAVE TO OVERCOME ALL MATTER OF THINGS TO GET AROUND THEWORLD IN 80 DAYS. YOUNG MATTHEW IS BECOME ENGROOSED IN THE GAME AND DID MANAGE TO GET ROUND IN 83 DAYS.

UNFORTUNATELY ON A COUPLE OF OCCASAIONS NOW ,WHILST IN MID-ATLANTIC, AN ERROR HAS OCCURED. DOES ANYONE KNOW OF A FIX FOR THIS?

I BELIEVE AT ONE TIME THAT IJK WERE TO RELEASE THIS.

OF COURSE THE FRENCH HAVE CHANGED THE HISTORY SLIGHTLY. YOU NOW START AND END IN PARIS!

THE HI -SCORES

AS I TYPE THIS PAGE (FEB.22nd);HERE ARE THE LATEST ADDITIONS / AMENDMENTS TO THE ALL-TIME HI-SCORE TABLE. (YOU HAVE ALL CERTAINLY BEEN BUSY).

KARATE - 23,800 - ARNT ERIK ISAKSEN.....COCK IN - 34,750 - VINCENT TALVAS
SNAKE VENOM - 102,822 - STALE EIKBRAATEN ... SUPER ADV. BREAKOUT - 17,050 - ARNT.

ICE GIANT - 15,780 - ARNT ... HARRIER ATTACK - 105,700 - STALE
ZEBBIE - 945,650 - STALE GUBBIE - 339,360 - STALE
RATSPLAT - 20,150 - STALE FORMULE 1 - 27,487 - ARNT
JEUX OLYMPIQUES - 50,147 - ARNT XENON III - 9,927 - STALE
FIREFLASH - 59,210 - STALE HOPPER - 40,170 - TIM COLGATE
DON'T PRESS THE LETTER Q - 1,229,620 - BRUNO DOSSIER
INSECT INSANITY - 43,300 - VINCENT TALVAS ... MR.WIMPY - 16,549 - ESPEN ANDERSEN

LONE RAIDER - 80,500 - ESPEN ANDERSEN.... LIGHT CYCLE - 4,333 - ESPEN ANDERSEN
SCUBA DIVE - 3,510 - JARLE KARLSRUD LODERUNNER - 16,738 - ARNTROCK RUN - 2,264 - PAUL HUTTON

DON'T PANIC - 3,107 (starting at level 1) - DAVE DICK
DON'T PANIC - 3,508 (starting at level 7) - JONATHAN BRISTOW
ATTACK OF THE CYBERMEN - 4,730 - HENRY MARKE... IMAGO - 6,820 (all screens) - HENRY MARKE

MIDNIGHT FEAST - 1,500,120 - HENRY MARKE (79 screens cleared,a few lives left, but it was dinner time) - note from the editor: - YOU ALWAYS GET THE FULL S.P FROM OUR 'H'.

PSYCHIATRIC - 41,070 - HENRY MARKE CENTIPEDE - 59,240 - HENRY MARKE
CENTIPEDE (by utilising a bug in the program - I will tell you next time) - 175,660 - RENE MARKE.

TEN LITTLE INDIANS

MAYBE A SOLUTION TO PETER THORNBURN'S PROBLEM WITH 'TEN LITTLE INDIANS' COMES FROM JAMES GROOM; AND I QUOTE:-

" I think you have to WAIT,then get off when the train stops. I think it puts up the possible exits on the screen (i.e East). If not then try LEAVE TRAIN when it stops;It's been a while since I actually played it (and I was actually playing the Speccy version),but it is something like that. But don't blame me if I'm wrong."

BACKGAMMON

A SOLUTION TO IAN BRADBURN'S RANDOM PROBLEM ON 'BACKGAMMON' FROM IJK HAS ARRIVED FROM THE WELSH WIZZARD.

REPLACE LINE 1 WITH THE FOLLOWING (YOU WILL NEED AN AUTO-STOP ROUTINE TO DO THIS) :-

1 CLS:Z\$=KEY\$:?"PRESS ANY KEY TO CONTINUE:REPEAT:A=RND(1):UNTIL KEY\$ <> ""
THIS APPARENTLY WILL THEN PRODUCE RANDOM DIE AND REMOVE SOFTWARE PROTECTION. FOR THOSE NEW TO PROGRAMMING; THE ? IS A SHORT COMMAND FOR 'PRINT'.

IT SEEMS A LITTLE ODD TO ME - ARE THERE A PAIR OF QUOTES MISSING!

WHAT DAY IS IT!

It would save me a little job if you could all date any correspondence that you send me. Otherwise If I forget to mark it then I can't keep them in rotation.

APRIL IS MINE

I am taking the month of April off from answering queries by phone (the Answerphone will be on) and also will not deal with any new written queries.

I will concentrate on having a break and catching up with any backlog. New orders will still be processed and of course O.U.M will still be published. Hopefully I will get to use the Oric for myself for a while - even if it only means testing some of the many pieces of software that are piling up.

DON'T FORGET - NO PHONE CALLS IN APRIL.

=====

THE A to Z OF SOFTWARE HOUSES

With a new Wordprocessor to hand, Brian Kidd is now setting about the task of re-typing his popular series on the A to Z of Software Houses.

I know that James Groom has been in touch with him recently with regard to some additions and queries.

=====

MAINTAINING A HI-SCORE TABLE

IN A RECENT 'CEO-MAG' A LISTING FOR A SUBROUTINE (FOR SEDORIC USERS) TO INSTALL A HI-SCORE TABLE IN GAMES. WRITTEN BY LAURENT CHIAICCHIERINI AND USED IN HIS 'MAHJONG' AND 'ORICSWAP'; IT WILL SAVE THE TABLE TO A SEQUENTIAL FILE ON DISK.

I AM GOING TO TRY IT WITH SOME OF THE GAMES THAT I HAVE, WHICH DON'T STORE HI-SCORES. I'LL LET YOU KNOW HOW I GET ON.

PAPER TABLE NAPKINS

ALAIN WEBER IS A COLLECTOR OF PAPER TABLE NAPKINS AND WONDERS IF ANY OTHER AMONGST YOU HAVE THE SAME HOBBY. HE WOULD BE PLEASED TO DO SWAPS.

MESSAGE TO ALLAN WHITAKER FROM DAVE DICK

WITH REGARD TO IJK's 'ZEBBIE'. THERE APPEARS TO BE A BUG IN THE DISC VERSION. THE GAME, WHICH IS ON A 'GAMEINIT' FORMATTED SEDORIC DISC, THROWS UP A 'BUG' WHEN YOU REACH THE 'BONUS SCREEN' ACCORDING TO 2 OF OUR 'GAMESTERS'. HAVE YOU HEARD OF ANY PROBLEMS WITH THIS BEFORE OR HAS ANY READER OUT THERE GOT A DISC VERSION, WHICH IS NOT 'BUGGED'??

MESSAGE TO JON BRISTOW FROM PETER THORNBURN

DON'T PANIC

- ABSOLUTELY BRILLIANT!

PRIZE PUZZLE NO.1 COMPETITION WINNER

THE WINNER WAS MATHMETICIAN COLIN COOK. HIS PRIZE IS ON IT'S WAY TO HIM. THE CORRECT ANSWER WAS 407. THE SOLUTION WORKINGS ARE LISTED ELSEWHERE IN THIS ISSUE.

PRIZE RAFFLE

WE AGAIN PLAN TO HOLD A PRIZE RAFFLE AT THE NEXT ORIC MEET. IF YOU HAVE ANYTHING TO DONATE THEN PLEASE SEND IT TO US OR BRING IT ON THE DAY. ALREADY OFFERED BY ROBERT CRISP IS A 'SHARP PC1211' POCKET COMPUTER. IT WAS THE FIRST COMPUTER HE EVER OWNED, AND COMES COMPLETE WITH MANUALS AND A CASSETTE INTERFACE. MANY THANKS TO ROBERT.

EMULATORS EMULATORS EMULATORS.....

AN INTRODUCTION FROM DAVE DICK

I SEEM TO RECALL READING IN OUR LITTLE MAGAZINE SOME TIME AGO THAT A COMPANY IN SCOTLAND HAD PRODUCED AN ORIC EMULATOR FOR THE AMIGA OR ATARI. O.K I SUPPOSE FOR TRANSFERRING DATA AND PERHAPS SUITABLE FOR PLAYING ONE OF YOUR OLD ORIC GAMES WITH BETTER RESPONSES.

I THOUGHT NO FURTHER ABOUT IT AS I DON'T OWN ANOTHER COMPUTER. JUST RECENTLY HOWEVER, THE WORD 'EMULATOR' HAS CROPPED UP A COUPLE OF TIMES IN CONVERSATIONS WITH ORIC USERS. TO START WITH DENIS REDFORD, WHO OWNS OTHER COMPUTERS, SENT ME A COPY OF AN ARTICLE IN THE NOVEMBER '92 ISSUE OF 'SINCLAIR/QL WORLD'.

IT DEALS WITH ZX81 AND ZX SPECTRUM EMULATORS FOR THE 'QL'. THESE EMULATORS ARE DISTRIBUTED ON A SHAREWARE BASIS. THEY COME COMPLETE WITH MANUALS AND ARE REGULARLY UPDATED. EACH EMULATOR IS STORED ON 3.5" DISC. IT IS REPORTED THAT 99% OF EXISTING ZX81 AND ZX PROGRAMS CAN BE ADAPTED.

FEATURES INCLUDE:- ZX81 PRINTER OUTPUT IS REDIRECTED TO THE QL SERIAL PORT, THE QL KEYBOARD IS FULLY MAPPED ON THE ZX81 KEYBOARD, TAPE COMMANDS OF SPECTRUM BASIC ARE REDIRECTED TO FLOPPY DISC, SPECTRUM SOUND CAN BE HEARD VIA THE QL BEEPER OR VIA THE NETWORK SOCKET. THERE ARE IN FACT TOO MANY FEATURES TO MENTION. (IF ANYONE WOULD LIKE A COPY OF THE ARTICLE THEN PLEASE SEND 2 x 24 pence STAMPS)

NOW IN 'ORICLAND' WE HAVE PERHAPS WITHOUT REALISING IT OUR VERY OWN FORM OF EMULATORS. LET'S FORGET FOR NOW ABOUT READING 'MSDOS' DISCS AND 'ARCHIMEDES' FILES.

LET'S REFLECT AND THINK OF WHAT WE HAVE GOT.

BY SIMPLY SWAPPING A ROM YOU CAN MAKE YOUR FAITHFUL OLD ORIC - 1 INTO AN ATMOS, EXCEPT YOU CAN'T UTILISE THE 'FUNCT' KEY.

MANY OF YOU HAVE NO DOUBT GOT SWITCHABLE ROMS IN YOUR ATMOS SO THAT YOU CAN STILL MESS ABOUT WITH YOUR OLD ORIC-1 TITLES.

THEN ALONG CAME 'SEDORIC DOS'. IT MEANT THAT BY LOADING THE FILE 'ROMORIC1' THAT YOU COULD THEN LOAD AND PLAY YOUR OLD ORIC-1 SOFTWARE ON YOUR ATMOS. OF COURSE YOU HAD TO LOAD IT IN FROM CASSETTE. HARRY PETERS AND HIS 'ROMV1.6' HAS CERTAIN FEATURES, WHICH I INTEND TO EXPLORE FURTHER.

WHAT IS THE 'TELESTRAT' IF IT IS NOT AN EMULATOR! CARTRIDGES ALLOW YOU TO LOAD YOUR ORIC-1 AND ATMOS SOFTWARE AND ON DISC.

WELL THAT IS MY INTRODUCTION, WHICH LEADS INTO A LETTER I RECEIVED FROM NIGEL ALEFOUNDER. I WILL PUBLISH THE LETTER AND THEN WE GO STRAIGHT INTO NIGEL'S ARTICLE/THOUGHTS ON AN ORIC EMULATOR.

UNFORTUNATELY NIGEL'S PRINTER IS ON THE BLINK AND I HAVE TO RE-TYPE HIS ARTICLE. THEREFORE DEPENDING ON HOW LONG IT TAKES ME TO RE-TYPE WILL BE THE DECIDING FACTOR ON WHETHER IT IS ALL PUBLISHED IN ONE GO OR SPLIT OVER A FEW ISSUES.

AN INTRODUCTION FROM NIGEL ALEFOUNDER

AFTER MY LAST COMMENTS ABOUT AN 'ORIC' EMULATOR FOR THE IBM PC I HAVE BEEN DOING SOME SERIOUS(!) THINKING ON THE SUBJECT. THE FRUITS OF WHICH I HAVE MADE INTO AN ARTICLE.

NOW I'M NO AUTHORITY ON 6502 MACHINE CODE, AND SO IF THERE ARE ANY GLARING MISTAKES IN MY ASSUMPTIONS - BY ALL MEANS CORRECT THEM. IN FACT, IF THE IDEA OF AN ORIC 'RUNNING' INSIDE AN IBM IS CLASSED AS HERESY, BY ALL MEANS DON'T READ ON!

AFTER SEEING A SPECTRUM AND A ZX81 UP AND RUNNING PROGRAMMES 'INSIDE' AN IBM PC; THE IDEA OF BEING ABLE TO PRESERVE THE LOYAL ORIC'S IN THIS WAY HAS APPEALED TO ME. I HAVE AN OLD SECOND-HAND PC, WHICH I GOT FOR FREE FROM AN EX-EMPLOYER AS IT WAS JUST SITTING THERE DOING NOTHING.....

PLEASE TURN THE PAGE TO SEE PART ONE OF THE ARTICLE.

O R I C E M U L A T O R F O R T H E I B M P C

The idea of running one computers operating system inside another, as a programme, may seem a daft one. Afterall, why spend a lot of money on a more technically advanced machine just to run the programmes belonging to a much simpler one? A bit like buying a FERRARI just to nip down to the corner-shop for some tea-bags.

The advantages aren't apparent until you actually see one working in the flesh. Recently I've seen both ZX81 and Spectrum emulators running quite happily on an IBM PC clone. For all the world - as it sat there, black 'K' cursor flashing on a white screen - it was a Spectrum, it was a ZX81.

All the software which originally ran on the Sinclair machines was able to run in the new host. What's more, with the help of a cheap, simple gadget you could load tapes directly! Where the superior hardware came into it's own was in the added facilities that the bigger memory and faster work-rate allowed. There were extensions to the key scanning routines allowing the function keys to call up extras like snapshots of memory to disk, changing the system speed and forcing a reset.

But, where the real justification for all this high-tech wizardry actually counted, in my mind, was in fact that the smaller emulated machine was being preserved. Not only it's spirit, it's quirky eccentricity that you either love or hate, but also a whole raft of business and game software which deserves a better fate than being consigned to the attic - or worse - the bin!

Now the whole charm of the Oric doesn't need me to explain. It is in the style of it's box, the ease with which it can be used, the friendly system software and the many facilities allowing connection to the outside world. Not to mention a huge library of great software. There is also no small measure of snob appeal; we are afterall a select breed us ORIC users.

To start with I thought the idea of 'putting' the Oric inside of an IBM machine was pretty foolish, but as I begun to think about all of the above I became more and more intrigued with the possibilities and the avenues which would open up, and decided to try and think out ways and means of doing this.

Now I'm going to try and get technical. Feel free to put me right if I've misunderstood the inner workings of either the ORIC or IBM machines. I'm no expert in machine code for one thing, and another, my programming skills generally leave a lot to be desired. What I've tried to do is rationalise the project and separate out the various tasks. Any programmers out there who feel up to the challenge, why not have a go, or at least contribute to a discussion on the idea? I know from reading OUM that many of you have IBM clones.

Where the Z80 based machines built by Sinclair have an advantage over the 6502 Oric, is in the similarities between parts of the instruction sets (the machine code needed to make the chip do anything) and the way it is used. A quick glance through the instruction set of the 8088 chip, which is the generic base all IBM PC's are derived from, shows that the 6502's 150 or so instructions have few direct equivalents. So one of the first obstacles to overcome is conversion of the operation-codes from one language to another. In many ways an emulator is just a fast conversion utility.

There are a few 'cheat' ways round this, but all seem to lead into a blind alley. For example - you can buy, through the shareware market for PC clones (henceforth known as PC), 'cross-assemblers'. These allow you to enter the assembly language listings of a simpler chip like the 6502 and they will generate an 8088 hex-dump capable of being 'linked' into a runnable programme. (The pseudo-Sam range is one). All you would then need to do is disassemble the ORIC Rom, feed the listing into the cross-assembler and produce runnable 8088 machine code. This falls flat because it won't really allow the necessary in/out system for the programme to run as an Oric emulator.

IN THE SECOND PART OF THE ARTICLE - WE WILL LOOK AT THE 'ULA', THE '8912', 'C' AND ALL MANNER OF OTHER THINGS.

PAGE 12
LET'S GET TECHNICAL

A NEW FEATURE IS THIS. RATHER THAN LUMP CERTAIN INFORMATION/QUERIES INTO ODD LITTLE SPACES I'VE DECIDED THAT THEY WARRANT A PAGE OF THEIR OWN. SOME ARE RELATED TO HARDWARE, SOME TO FIRMWARE AND OTHERS TO UTILITY SOFTWARE. SO LET'S GET TECHNICAL.

- DAVE DICK

SPARE TIPS

HARRY PETERS HAS RECENTLY RECEIVED AN OLD 'KAYPRO' CP/M "PORTABLE" COMPUTER (ABOUT 20kg). THE MACHINE IS WORKING PERFECTLY. HOWEVER, NOTHING CAN BE DONE WITH THE OLD BEAST WITH IT'S OLD FASHIONED OPERATING SYSTEM WITHOUT GRAPHICS. IN IT HARRY HAS FOUND TWO IC'S WHICH ARE ALSO USED IN THE ORIC, NAMELY DISKCONTROLLER WD1793 AND DATA SEPARATOR WD9216. IF SOMEBODY NEEDS THESE CHIPS TO REPAIR A DISKCONTROLLER THEN THEY SHOULD CONTACT HARRY DIRECT AT: - MARATHON 28, 2924 XD KRIMPEN A/D IJSSEL, NETHERLANDS.

PERHAPS THESE MAY BE OF HELP TO DENNIS BONFIELD!

PROGRAMMING TECHNIQUES

COMING SOON TO O.U.M. WILL BE AN OCCASIONAL SERIES ON PROGRAMMING TECHNIQUES FROM MATTHEW COATES. MATTHEW HAS BEEN LOOKING AT SOME PROGRAMS/LISTINGS THAT HAVE BEEN PUBLISHED IN O.U.M AND HAS SOME IDEAS TO IMPROVE THEM. THIS SERIES WILL ALSO BE OF GREAT HELP TO THOSE WHO WRITE PROGRAMS.

CGA COLOUR MONITOR

BRIAN KIDD HAS RECENTLY ACQUIRED A CGA COLOUR MONITOR AND ASKS IF ANYONE HAS ANY IDEAS ON HOW TO CONVERT IT TO RGB. IT HAS A 9 PIN 'D' TYPE SOCKET, WITH 8 PINS UTILISED (PIN No.7 IS NOT USED). THE MAKE IS 'TVM' AND THE MODEL IS MD3 - 50/60 Htz. REPLIES TO O.U.M OR TO BRIAN AT :- 23 HOWARD CLOSE, ROYAL OAK, NEWPORT, GWENT. NP9 9FR

THE 'TAKE' COMMAND

STORING ARRAYS ON SEDORIC DISC HAS CAUSED A FEW PROBLEMS TO NEW READERS. ON A TAPE SYSTEM, 'STORE' AND 'RECALL' ARE STAND ALONE FUNCTIONS e.g 'STORE A#' STORES AN ARRAY 'A#' ON TAPE. ON SEDORIC THE 'PUT' AND 'TAKE' COMMANDS ARE NOT STAND ALONE FUNCTIONS. THEY NEED TO BE APPLIED IN A 'FOR/NEXT' OR 'REPEAT/UNTIL' LOOP. FOR INSTANCE:-
OPEN S,"FILE",2
FOR R=1 TO 20 A\$(R)=STR\$(R)
PUT 2,A\$(R)
NEXT
CLOSE
WILL STORE AN ARRAY 'A#' ON DISC.

IF YOU HAVE A TAPE BASED PROGRAM AND NEED TO TRANSFER THE ARRAYS TO DISC THEN WITH SEDORIC YOU HAVE TO WRITE A SMALL PROGRAM, BUT I BELIEVE WITH 'ORICDOS' IT IS EASIER.
IF ANYONE HAS A PROGRAM TO TRANSFER ARRAYS THEN WE WOULD BE HAPPY TO RECEIVE IT AND PASS IT ON.

TANDATA

YOU MAY REMEMBER THAT ROBERT CRISP HAD GOT HOLD OF A 'TANDATA' MONITOR. LATEST FROM HIM IS THAT HE IS HOPING TO BORROW A LEAD FOR THE MONITOR SO THAT HE CAN WORK OUT THE CONNECTIONS. HE NOW HAS A MANUAL FOR THE 'TANDATA' SYSTEMS, BUT IT DOESN'T DESCRIBE THE MONITOR CONNECTIONS. MEANWHILE FOR 40 POUNDS O.U.M READER KEN EVANS HAS BOUGHT A SECOND HAND RGB MONITOR. IT IS A 'TANDATA' PRESTEL MONITOR (IRRELEVANT TO ORIC?). MADE IN JAPAN BY MITSUBISHI (HE THINKS). IT HAS A 12" SCREEN. THERE MAY BE SOME MORE IN THE OFFING (ABIT DEARER THAN ROBERT'S SUPPLIER). THEY WERE ORIGINALLY USED IN A TRAVEL AGENTS AND THUS HAVE A FEW 'MINOR' SCREEN BURNS.

PERHAPS KEN AND ROBERT SHOULD GET IN TOUCH WITH EACH OTHER.
KEN EVANS IS AT :- 25 ST.PAULS STREET NORTH, CHELTENHAM. GL50 4AD (TEL: 0242 245030).
ROBERT CRISP IS AT: - 44 BENTLEY GROVE, MEANWOOD, LEEDS. LS6 4AT (TEL: 0532 745294)

AN HYBRID

A COUPLE OF QUERIES FROM ARNT ERIK ISAKSEN TO GET YOU THINKING.
ARNT ASKS THE FOLLOWING: " IS IT POSSIBLE TO USE THE 'VIC -1541' DISC DRIVE (CBM) WITH THE ORIC? IT USES A 6 PIN DIN-PLUG. ALSO, WHAT HAPPENS IF I REPLACE THE AMSTRAD ROM WITH AN ORIC ROM AND AT THE SAME TIME REPLACE THE 280 PROCESSOR WITH A 6502? IS THIS POSSIBLE? I AM READY TO KILL THE AMSTRAD IF THIS IS POSSIBLE, AND 'ORIC AE1' WILL BE BORN".
WELL I THINK YOU WILL NEED TO IMPLANT THE ORIC 'ULA' SOMEWHERE AND THEN WAIT FOR PART 2 OF NIGEL ALEFOUNDER'S ARTICLE ON EMULATORS.

BRIAN'S PRIZE PUZZLE #2 - MARCH 1993

THE OTHER SUNDAY, THE HYMN NUMBERS ON THE CHURCH HYMN BOARD APPEARED AS SHOWN:

```

      +
    + +
  +   +
+++++++
+   +
+ 192 +
+ 384 +
+ 576 +
+   +
+++++++

```

WHAT WAS SO UNUSUAL ABOUT THESE SETS OF NUMBERS, WAS THAT ALL WERE MADE UP OF DIFFERENT DIGITS, AND NO TWO DIGITS WERE ALIKE. ALSO THE 2ND NUMBER WAS $2 * \text{NO.1}$ AND THE 3RD NUMBER EQUAL TO THE SUM OF NOS. 1 & 2

WHAT OTHER NUMBER SETS HAVE THESE PROPERTIES

ANSWERS TO ME BY MARCH 23rd PLEASE

1ST PRIZE - 10 DIGIT SCIENTIFIC CALCULATOR

2ND PRIZE - A & F'S 'PAINTER'

GOOD LUCK - BRIAN KIDD

=====

SOLUTION TO PRIZE PUZZLE NO.1

148 :

```

RAMBLING IN THE ROM - 47

CPD-20 S.T.D.

A number of you have asked how the data in STD can be changed. The following is a very simple program to achieve this, a much prettier version is now supplied with the main program, called 'STDEDIT.COM'.

```

10  OPEN R, "STDCOD", 1
20  FIELD 1, PLACE TO $32
30  REPEAT: CLS : PRINT
40  INPUT "Number to amend"; N$: N$ = LEFT$ (N$, 4)
50  N = VAL (N$)
60  TAKE 1, N
70  PLACE > PL$
80  IF LEFT$ (PL$, 1) <> "*" THEN PRINT: PRINT PL$: PRINT
90  INPUT "New data to be entered"; P$
100 IF P$ = "=" THEN 130
110 LSET PLACE < P$
120 PUT 1, N
130 UNTIL N$ = "0000"
140 CLOSE: END

```

The program asks for the number whose data you wish to alter and strips it to the first four numbers. It then prints the existing data for your inspection. If you decide not to change it, type '=' and press RETURN, another number will be requested. If you do want to change the data, enter the new data and press RETURN. The program stores it on disc and then prompts for another number. To exit type the number '0000'.

Rambling on...'READ' (COMMAND)

Principal:

The READ command is also used by GET and INPUT. Byte #2C tells you which command is using the routine; it is 00 (nul, b7=0 and b6=0) for INPUT, #40 for GET (not nul, b7=0 and b6=1) and #98 for READ (b7=1 and not nul).

A pseudo DATA pointer is used (#B2-3). This is initialised on the true pointer for READ, on #0034 for INPUT and #0036 for GET. At the end, if it is a READ, the true pointer (#B0-#B1) will be replaced with the current value. It is also necessary to save the value of TXTPTR (in #BA-#BB) because it is used to evaluate the data. In every case it is recovered at the end.

Numeric and alphanumeric values are treated separately. One complication for alphanumeric values is that if they are surrounded by quotation marks (only uses - to permit spaces at the start of data which would otherwise be ignored or the use of commas which would otherwise be treated as separators) it will be necessary to jump over them; several neat pieces of programming follow in relation to giving effect to them.

------	--------	------	--------	-------------------------------

First, I must apologise for missing the last few issues of O.U.M. It is a particularly fierce time in industry and survival is the order of the day. Luckily, so far, I have survived but this week I have had to say farewell to quite a few colleagues and every news report seems to add more gloom with people losing their livelihood. I hope that we all can look forward to better times very soon.

It is at a time like this that a hobby such as computing can be a therapeutic diversion and, of course, the ORIC provides a good platform to achieve this on. Software is very reasonably priced and its BASIC and hardware is easily understood, so I must try to create some more time in which to dabble. I have told Dave that I would limit this article to one page but I will strive to resume normal service for the April issue.

WORD-SPEED

I am pleased to announce that Ray McLaughlin has passed an update for WORD-SPEED onto me, so I will be evaluating it and I intend to release details in the next issue.

DISC BASIC

I intend to continue with the series on how to make use of SEDORIC DOS's facilities and having covered sequential access files the next topic will be Sorted Sequential Files.

GEOFF PHILLIP'S BOOK

If memory serves me right, then I will be covering the cassette input/output facilities next month.

TAPE ODDMENTS

I was examining a small box lurking at the back of my loft which had a few tapes in them. They are for the ORIC-1 (some can be converted for the ATMOS as they are BASIC programs) but they may of interest to some users. Anyway, to cover postage, etc. they can be bought for 50p each. The list includes :-

- 1 Bar Blaster by Byteland (1983?). A variant of the Breakout game. I have 2 copies.
- 2 Cascade 50 by Cascade Games (1983). A collection of mainly BASIC programs covering a wide variety of simplistic games.
- 3 Leopard Lord by Kayde Software Ltd. (1983). This company was one of the first to bring out a series of adventure games for the ORIC. 2 copies.
- 4 Memory Map by Byteland (1983?). A maze game. 2 copies.
- 5 Word Processor by Juniper Computing (1983). This was a fairly simple word-processor written for the ORIC and the Dragon-32, which has been mentioned a few times in recent issues. 4 copies.

There are a few more but I need to have a look at them first and see if they are satisfactory. So see you next month Allan.

DATeline: SATURDAY FEB.27th.

FOR SOME REASON IT HAD TO SNOW JUST LIKE WHEN I ORGANISED A FEBRUARY 'ORIC MEET' A FEW YEARS AGO. I SOON DISCOVERED THAT THE VENUE WAS NOT WHERE I THOUGHT AND HAD LED JONATHAN HAWORTH AND DAVID WILKIN TO BELIEVE. ANYWAY, IN THE END WE ALL MEET UP. ALSO ALONG WERE MY YOUNGEST SON - MATTHEW AND JON'S SON NICHOLAS AND A PAL OF HIS (I NEVER DID FIND OUT HIS NAME).

WHY WERE WE IN HENEL HEMPSTEAD? IT WAS THE LOCATION FOR AN 'ALL FORMATS COMPUTER FAIR' ORGANISED BY THE WIDELY 'ACCLAIMED' BRUCE EVERISS. I HAD CHECKED WITH BRUCE TO MAKE SURE THAT THE SHOW WAS STILL ON. BRUCE VAGUELY REMEMBERED BEING INVOLVED EITH ORIC. HE SAID HE WORKED ON THE SOFTWARE SIDE AND AFTER I HAD THROWN A FEW NAMES AT HIM HE REMEMBERED THAT IT WAS 'TANSOFT'. I ASKED IF HE WOULD LIKE TO DO AN INTERVIEW FOR 'O.U.M' READERS, BUT HE DECLINED ON THE GROUNDS THAT HE WAS SHY!

FOR THE 4 pound ENTRANCE FEE (I'D FORGOTTEN MY 1 pound OFF VOUCHER), IT WAS A BIT OF A DISSAPPOINTMENT TO ME. NOWHERE NEAR AS MANY STANDS AS THE ONE ATTENDED AT THE HORTICULTURAL HALLS A COUPLE OF YEARS BACK. EVEN SO, BY CHARGING AN ADMISSION FEE AND THEN A MINIMUM OF 60 pounds PER STAND, THERE MUST BE SOME PROFIT IN BEING A SHOW ORGANISER.

JON NOTED THAT WERE NOT MANY 'BARGAINS'. IN THE WAY OF 'ORIC' MATTER HE FOUND TWO CASSETTE LEADS AND TWO ORIC-1 BOOKS. SECOND-HAND 720K, 3.5" DRIVES COULD BE HAD FOR 30 pounds - NOT CHEAP. DAVID AND I BOUGHT SOME 3.5" DISCS AND NEAR THE END I PICKED UP A COUPLE OF 5.25" 'TEAC' 40 TRACK DOUBLE SIDED DRIVES. I ALSO BOUGHT A RIBBON FOR HALF THE NORMAL PRICE FOR THE SEIKOSHA PRINTER. I WOULD OF BOUGHT MORE RIBBONS, BUT THE VENDOR INSISTED THAT THE 'AMSTRAD 8256' RIBBON WAS NOT COMPATIBLE WITH MY PRINTER. WHEN I GOT HOME I FOUND I WAS RIGHT. DON'T BELIEVE ALL A SALESMAN TELLS YOU!

BY BARTERING AT A STAND THAT WAS PACKING UP I MANAGED TO GET THE NEW LYNX HAND HELD GAMES MACHINE FOR 30 pounds. BY NEW I MEAN LATEST MODEL FOR WHEN I GOT HOME I DISCOVERED THAT THE MACHINE ITSELF WAS NOT NEW. ARE ALL NEW MACHINES SUPPOSED TO HAVE THE SERIAL NUMBER REMOVED AND THE NAME 'SAM' ENGRAVED ON THE UNDERSIDE WITH A KNIFE?

THE BULK OF THE STANDS DEALT WITH THE NEWER MODELS - PC's (PLENTY OF PD/SHAREWARE), AMIGA, ATARI AND CD ROM MATERIAL. THERE WAS A SPLATTERING OF CASSETTE SOFTWARE FOR THE COMMODORE AND SPECTRUM MACHINES.

INEVITABLY THE GANG OF THREE ENDED UP IN THE BAR AREA TO DISCUSS ORIC MATTERS.

WE TALKED ABOUT TRACK/SECTOR ERRORS THAT DROP UP ON SEDORIC. JON TOLD ME OF HIS PLANS FOR ARTICLES FOR FUTURE ISSUES OF O.U.M AND UNVEILED 'THE NAKED ORIC'. (SEE REPORT ON ANOTHER PAGE).

NICHOLAS HAWORTH HAS BEEN LOGGING ONTO THE CYCLONE BULLETIN BOARD RECENTLY AND NOW INTENDS TO START UP AN ORIC BOARD (FULL DETAILS ELSEWHERE). NICHOLAS HAS CERTAINLY BEEN BUSY OF LATE. HE IS ALSO STILL WORKING ON AN ORIC VERSION OF A WELL KNOWN BOARD GAME.

ALL IN ALL A FRUITFUL AFTERNOON SPENT IN GOOD COMPANY AND WILKIE ASKED ME TO PRINT THE FACT THAT HE BOUGHT ME A PINT!

MANY TOPICS WERE COVERED IN OUR CHIT-CHAT INCLUDING MIDI INTERFACES (AT LAST A REALITY FOR THE ORIC), THE TELESTRAT, WORDSPEED etc.etc.

AS WE MADE OUR FAREWELLS WE LOOKED FORWARD TO THE AYLESBURY ORIC MEET IN JULY AND THERE WAS A HINT FROM DAVID AND JON THAT A VISIT TO PARIS IN JUNE WAS ON THE CARDS.

- DAVE DICK

THE FRONT COVER

READERS MAY LIKE TO KNOW THAT THE FRONT COVER OF THIS ISSUE SHOWS THE PROTOTYPE ORIC-1. IT'S COLOURS WERE TEAK AND APPLE GREEN AND IT WAS AIMED AT THE EXECUTIVE DESK TOP USER. ONE OF ORIC'S MAIN SHAREHOLDERS, NAMELY 'BRITISH CAR AUCTIONS', WERE NOT IMPRESSED THAT THE COLOURS WERE COMMERCIAL ENOUGH AND SO THEY GOT YOUR OLD GREY ONE.

"THE NAKED ORIC"

THIS IS THE LATEST PUBLICATION FROM OUR JONATHAN HAWORTH. THE TITLE 'THE NAKED ORIC' IS I BELIEVE A STRAIGHT TRANSLATION OF THE PHRASE "ORIC A'NU".

ALL IN ONE BOOK IS THE DISASSEMBLY OF THE ORIC -1 AND ATMOS ROMS FROM #0000 TO #0FFF. THE OTHER ADDRESSES WILL BE COVERED IN THE SEQUELS AS THIS IS JUST 'THE NAKED ORIC PART ONE'.

UNASHAMEDLY TRANSLATED FROM FABRICE BROCHE'S PUBLICATION, THIS 61 PAGE WORK IS OF THE SAME QUALITY PAPER OF JON'S OTHER RECENT PUBLICATIONS.

AS WELL AS THE TEXT THAT GOES WITH ADDRESSES, THERE ARE ALSO FLOWCHARTS AND AN INDEX.

MANY ITEMS OF INTEREST AND TOPICS FOR DISCUSSION. FOR EXAMPLE THE COMMENT AT #09FB IS:- IS IT POP? ,WHILST AT #047D IS :- PRINTER OFF (POINTLESS!).

PLENTY OF POINTS TO THINK ABOUT.

FOR THOSE WHO DIDN'T KNOW, FABRICE BROCHE WAS THE AUTHOR OF SEDORIC AND THE TELESTRAT ROM.

THIS BOOK FOR THOS INTERESRED IN THE WORKINGS OF THE ROM CAN BE ORDERED DIRECT FROM JON HAWORTH AT: 3 MADINGLEY ROAD, CAMBRIDGE. CB3 0EE.

PRICE INCLUDING POSTAGE IS: 4 pounds.

BTS "a" BBS

SUPERCOP

I HAVE NOW RECIEVED A 'GOOD' COPY OF 'SUPERCOP' FROM HARRY PETERS. IT TURNED OUT THAT IT WASN'T THE FACT THAT THE VERSION I HAD WAS CORRUPTED, BUT IT UTILISED COMMANDS ONLY APPLICABLE TO HARRY'S V1.6 ROM.

THE COPIER IS FOR FOR: - TAPE TO DISC, DISC TO TAPE, AND DISC TO DISC. I NOW HAVE TO TEST IT THOROUGHLY AND WILL REPORT FURTHER.

TWO LINER

REGARDING THE TWO LINER IN THE LAST ISSUE OF O.U.M - STAN HOLDEN WROTE IN TO SAY:- "REMOVE THE FULL STOPS IN LINE 1 AND CHANGE 126 TO 123 IN LINE 2 FOR SOMETHING A LITTLE DIFFERENT"

FUNPARK

THOSE WHO RECIEVED THE SECOND O.U.M DISC WILL PROBABLY OF SPOTTED A BUG IN 'FUNPARK'. ACCORDING TO BRIAN KIDD THERE WERE NO SEEN ERRORS USING 'POP'. HE SAYS TO OVERCOME THE 'RETURN WITHOUT GOSUB' ERROR YO SHOULD DO THE FOLLOWING:-

ADD LINE 9632 IFA=13 THEN GOTO 3674

AMEND LINE 3874 TO READ: GOTO 92 (NOT RETURN)

AMEND LINE 3838 TO READ: GOTO 38 (NOT RETURN).

AS THE DISC IS SEDORIC YOU CAN THEN OVERWRITE THE ORIGINAL FILE WITH - SAVED "FUNPARK", AUTO

IF PREFERRED YOU MAY SEND YOUR DISCS BACK TO ME (DAVE).

TURBOLOAD

BRIAN KIDD TELLS ME THAT HE NOW HAS A FULLY WORKING VERSION OF THE 'TURBOLOAD' PROGRAM FROM STEPHEN NEACHEN, AND IS CURRENTLY TESTING IT.

RUMANIA BOUND

AS WELL AS EMBARKING ON HIS VISITS TO SPAIN, OUR RESIDENT TEACHER FRANK BOLTON WILL BE SPENDING SOME TIME IN RUMANIA THIS YEAR HELPING WITH RELIEF WORK.

THE INTREPID FRANK WILL BE TAKING ALONG AN ORIC-1, A CASSETTE PLAYER AND WORD PROCESSING PACKAGE. YOU CAN'T KEEP A GOOD MACHINE OUT OF THE THICK OF IT.

BEST WISHES TO FRANK.

NOW MR. HOPPS - DID YOU EXPORT ANY ORICS INTO RUMANIA?

THE SERIAL PORT

TREVOR SHAW SAYS THAT HE HAS HAD NO FEEDBACK REGARDING HIS FILE TRANSFER PROGRAM THAT WAS PRINTED IN THE DECEMBER O.U.M. HE WANTS TO KNOW IF ANYONE HAS TRIED IT AND IF IT WORKS PROPERLY.

I KNOW A LOT OF INTEREST HAS BEEN SHOWN FROM LETTERS THAT I RECIEVE. A FEW OF YOU HAVE NOW DUG OUT YOUR MODEMS AND SOMEONE HAS JUST PURCHASED ONE. PLEASE LET ME KNOW READERS - HOW FAR YOU HAVE GOT SO FAR. UNLESS THE INTEREST IS THERE THEN WE WON'T GET A FURTHER ARTICLE ON THE SERIAL INTERFACE FROM TREVOR.

MEANWHILE I HAVE SENT TREVOR A DISC SO THAT I CAN HAVE THE PROGRAM. IF ANYONE WOULD LIKE A COPY THEN THEY SHOULD SEND A BLANK DISC PLUS 2 x 24 pence STAMPS TO ME (DAVE). ALTERNATELY YOU CAN SEND 2.00 TO INCLUDE A 3" DISC, 1.00 TO INCLUDE A 3.5/5.25"

TREVOR ALSO ASKS IF READERS WOULD LIKE A GLOSSARY OF TERMS. HE ALSO ASKS IF YOU WOULD BE INTERESTED IN ARTICLES ABOUT OTHER COMMUNICATIONS TOPICS e.g: BULLETIN BOARDS, HOMEWORKING, MACHINE TO MACHINE FILE TRANSFER (e.g. ORIC TO ARCHIMEDES OR P.C).

COME ON READERS PUT THOSE PENS TO PAPER. WRITE TO YOUR EDITOR NOW!!! THIS MAGAZINE IS HERE TO MEET YOUR REQUIREMENTS - SO DO IT NOW!

YET MORE BETS 'R' BODS

QUOTE OF THE WEEK

I WAS RECENTLY GIVEN THIS QUOTE ABOUT ERSTWHILE MANGAING DIRECTOR OF 'ORIC', MR. BARRY MUNCASTER - "BASICALLY HE WAS A CROOK".

AS WE CANNOT AFFORD A WRIT I CANNOT PUBLISH THE NAME - JUST A FEW ONE LINERS:-

- 1 PRINT" HE ENDED UP DRIVING PAUL KAUFMAN'S MERCEDES"
- 2 PRINT" HE WOULD DO WELL AS A DOUBLE GLAZING SALESMAN FOR ONLY THE BEST FIT (WELL ALMOST)
- 3 PRINT" SOUNDS LIKE AN AUSTRALIAN WHO WOULD GO WELL WITH A SHEILA!"
- 4 PRINT" IN HIS CURRENT OCCUPATION DOES HE OWN A 'FISHY' BUSINESS.

ALL FORMATS FAIRS

WITH THIS ISSUE YOU WILL FIND A 1 pound OFF VOUCHER FOR ONE OF THE MANY 'ALL FORMATS FAIRS' STAGED AROUND THE COUNTRY.

ROBERT COOK AND 'LORIGRAPH'

ROBERT INFORMS ME THAT HE DIDN'T USE 'LORIGRAPH' FOR THE PICTURES HE DREW. IN FACT HE USED 'OUM CAD' WITH AMENDMENTS FROM JAMES GROOM. HE PAINSTAKINGLY TRACED THE PICTURES ONTO GRAPH PAPER AND DID IT ALL PIXEL BY PIXEL.

BULLETIN BOARD

A BULLETIN BOARD FOR THE ORIC IS THE LATEST VENTURE FROM NICHOLAS HAWORTH. IT WILL BE CALLED 'ORICALL'. ('ORICALL' WAS THE NAME GIVEN TO THE NEVER TO BE PUBLISHED 'ORIC CLUB' MAGAZINE AT THE TIME THAT ORIC WERE TO TAKE A SUBSTANTIAL NUMBER OF PAGES ON PRESTEL TO CREATE AN ORIC DATABASE FOR MODEM USERS).

THE BULLETIN BOARD WILL BE RUN OFF A P.C.

NICHOLAS WANTS A MINIMUM OF 13 USERS TO MAKE IT WORTHWHILE AND THEREFORE WOULD THOSE INTERESTED PLEASE DROP ME A LINE SO THAT NICHOLAS KNOWS WHETHER TO PROCEED.

ABOUT THE BULLETIN BOARD

I HAD A CHAT WITH YOUNG NICK AT HEMEL AND BASICALLY THIS IS WHAT IS ENVISAGED:-

THE BULLETIN BOARD WOULD INCLUDE ANY LATE NEWS FROM O.U.M AND THE C.E.O. THE COST TO LOG ON WOULD BE THAT OF A TELEPHONE CALL.

LETTERS ADDRESSED TO JON HAWORTH AND DAVE DICK COULD BE LEFT.

THERE WOULD BE AN ORIC FILE SECTION WHERE YOU COULD DOWNLOAD FILES DIRECT e.g PUBLIC DOMAIN.

SOFTWARE UPDATES: PERHAPS BE ABLE TO UPDATE SHAREWARE AND COMMERCIAL SOFTWARE. AS AN EXAMPLE IF YOU WANTED THE LATEST UPDATE TO SEDORIC (OBVIOUSLY NICK WOULD HAVE TO TALK TO ALLAN WHITAKER ON THIS ONE). YOU WOULD BE ISSUED WITH A PASSWORD. AS CALLS ARE LOGGED THEN YOU WOULD BE INVOICED FOR THE UPDATE. OF COURSE IF YOU PASSED YOUR PASSWORD AROUND THEN YOU WOULD END UP PAYING FOR ALL YOUR MATES UPDATES.

A LINK TO O.U.M - DATA FILES e.g. MATERIAL FOR AN ISSUE OF O.U.M COULD BE UPLOADED DIRECT TO O.U.M. YOU COULD ALSO SEND YOUR PROGRAMS FOR EVALUATION.

OPENING HOURS - THESE WOULD BE AT CERTAIN TIMES TO BE DECIDED BY AND PUBLISHED BY NICK.

WELL - HOW DOES THAT GRAB YOU?

HAVE YOU ANY FURTHER IDEAS?

WILL YOU BE ONE OF THE 13+?

WRITE TO O.U.M NOW!!!!

- DAVE DICK

THE NEXT ORES MEET IN AYLESBURY IS ON SATURDAY JULY 17th

DAVE LOOKS AT THE LETTER 'A'

A COUPLE OF MONTHS BACK I SAID THAT I WOULD LOOK AT MY PERSONAL A to Z OF SOFTWARE. I GOT MY INDEX AS UP TO DATE AS TIME WOULD PERMIT AND SO THERE ARE STILL SOME GAPS. I HAVE ONLY INCLUDED THOSE TITLES THAT I HAVE ON DISC AND THEREFORE SOME STILL ONLY ON CASSETTE ARE OMITTED.

TO GIVE A NARRATIVE ON EACH TITLE WOULD MEAN THIS SERIES RUNNING FOR MANY YEARS, AND SO I'VE ONLY GONE INTO DETAIL ON THE LESSER KNOWN ONES. EVEN SO, THIS COULD LAST FOR MANY MANY ISSUES. WE START WITH THE LETTER 'A'.

ANTICS - Geoff Heynes translation of a French 'rescue the maiden game', with overtones of DINKY KONG. Written by Stephane Massart and originally entitled SINGERIE, this super game was available on a CEODISC.

ATTACK OF THE CYBERMEN - IJK's arcade is compatible with the ALTAI/PASE interfae.

ACHERONS RAGE - SOFTEK title by S.CHAPMAN. Like many from this company there is a training mode. You are in outer space and zap all.

A VIEW TO A KILL Pts.1 and 2 - DOMARK's rendition of the James Bond movie. Two arcade adventures.

A VIEW TO KILL Pt.3 - Jean Boileau got hold of this and passed it to the CEO. Based around the Eiffel Tower, this is an utterly frustrating maze/arcade. I've given up on it. Does anybody understand it?

ANTICRACK (V2.1b) - Andre Widhani's tape header reader.

AFRICA - was on the first OUMDISC.

ARRAYSORT - from MICR'ORIC - you enter 10 random words and they are sorted alphabetically.

AWARI - The very basic and very slow rendition of this strategy game from Geoff Phillips.

AWARI - from LANDSCAPE as part of their VOTRAX speech program. You play the game and listen to the phonems.

ATTACK ON KIXI - penned by Simon Grascwitz. Simon and a friend had a five pound wager on who could produce the best game for the Oric. This was the result. Never officially released it nevertheless found it's way to France and then back here to old blighty. A good Invaders game and with Simon's permission will go on PD or a future OUMdisc.

APPENDRE L'ANGLAIS - from the Winter 1990 CEODISC this is English lessons for the French. Of course it could help us with our French.

ALPHABET - from the same CEODISC a fun game. Control your man, avoid the blocks and pick up the letter 'A'. Next screen you pick up 'A' and 'B', and so it goes on. All against the clock.

ATTERRISSAGE - same source as the last two. A simple listing. Land your craft on the pads.

ATLANTID - a novel French arcade from Sprites.

ADDING - Judy Simms's addition program. I got the correct answer working it out in my head, but was told I was wrong. Reason being that when you are at school you have to put the last digit first.

AUTHOR - Tansoft's word processor adapted for disc by Owe Fransson.

ACCOUNT BOOK - Softbacks program now coupled with ORIC-CALC and available from our mail order section.

ASTRONOMER - Rob Kimberley's Oric version on PD - CPD -51

A TABLE - Daniel 'WILLY' Duffau passed this on to me. Written by M. Archambault. You insert the names of your guests and waiters etc. for a dinner party. The permutations of who sits where are displayed. When you're happy you print it off. I'm sending this to the Queen!

ATMON - the Mick Poat conversion of this dissassembler/monitor. Mick, by the way, was the famed drum machine man.

ALPHA - Sedoric utility for sorting a directory.

ARROW OF DEATH Pts.1 and II - Mysterious Adventures from Channel 8. Graphical and available on disc from OUM Mailorder.

AIGLON - a French arcade that is about as smooth as SPOKKY MANSION!!!

ATMOSAPARIS - C.Rey's French MONOPOLY from THE ORIC.

ARIA - some serious music from a CEODISC.

AIRLINE - C.C.S title - strategy for Richard Branson fans - I've sent this to the British Airways board.

ARTIST - a drawing aid.

ANAGRAM - that's what it is!

ACROBATES - novel Breakout from HEBDOLOGICIEL.

AROUND THE WORLD IN 80 DAYS - from NO MANS LAND - a nice graphical strategy now in English.

WELL I ENJOYED DOING THAT. SOME PROGRAMS I HADN'T LOOKED AT FOR A LONG TIME.

NEXT TIME ROUND WE WILL LOOK AT THE LETTER 'B' ONWARDS.

- DAVE DICK

FROM HARRY PETERS COMES THIS TYPE-IN FOR READERS. IT IS A 'MANDELBROT' DRAGONS PROGRAMS THAT DRAWS A NICE PICTURE.

NOTE TO TAPPERS:- LINE 5 IS ONLY FOR 'SEDORIC' USERS AND IS NOT NEEDED FOR THOSE ON 'ORICDOS' OR THOSE WHO ARE CASSETTE BASED. THOSE WITH 'SEDORIC' CAN UTILISE 'FUNCT' and 'J' TO SAVE HAVING TO TYPE 'CURSET' IN EVERY TIME.

RECENTLY I HAVE CONNECTED A COLOUR TELEVISION WITH SCART PLUG TO MY ORIC AND NOW HAVE BEAUTIFUL COLOURS, AND A VERY SHARP IMAGE ON MY MONITOR. HERE IS A DRAWING OF THE MONITOR LEAD AS I MADE IT.

THE RESISTORS ARE IN THE SCART PLUG. THE +5V I TOOK FROM THE POWER SUPPLY.

R1=R2=R3=R4 = 470 OHMS

R5 = 68 OHMS (note from the Editor - I think it was 68 - if it should be 60 then please let me know HARRY!)

WHEN THERE IS STILL NO IMAGE THEN R5 CAN BE DELETED.

- HARRY PETERS

=====

WELL HOPEFULLY YOU WILL THINK THIS TO BE ONE OF THE BETTER ISSUES OF D.U.M PRODUCED.
PLANNED FOR FORTHCOMING ISSUES ARE THE FOLLOWING:

AN ARTICLE ON SCART FROM JON HAWORTH.

MORE ON EMULATORS.

THE FINALE TO THE C.E.O STORY FROM VINCENT TALVAS.

A CONTINUATION OF BRIAN KIDD'S A TO Z OF SOFTWARE HOUSES.

MORE LISTINGS, MORE TIPS AND MORE.

GET THOSE ITEMS IN.

CLOSING DATE FOR ITEMS FOR INCLUSION IN THE APRIL D.U.M IS MARCH 24th.

DUM DISC No.2

ALL THOSE WHO RECIEVED THE SECOND D.U.M DISC SHOULD ALSO OF RECIEVED A C.A.D MANUAL, A LONE RAIDER INLAY AND A 2 PAGE INSTRUCTION SHEET. IF YOU DID NOT RECIEVE ALL THEN PLEASE GET IN TOUCH.

ON EARLY EDITIONS OF THE DUM DISC THE PROGRAM 'STARSIGN' WAS OMITTED FROM THE MENU. IT IS ON THE DISC. PLEASE DO ONE OF THE FOLLOWING: - a) CALL IT FROM BASIC, b) AMEND YOUR MENU or c) SEND THE DISC BACK.

HAVE YOU PAID ????

IF YOU STILL OWE FOR YOUR DISC OR INDEED IF YOU STILL OWE FOR ANY OTHER SOFTWARE THEN SEND ME THE MONEY NOW! UNLESS ACCOUNTS ARE SETTLED WITHIN 14 DAYS (OR A GOOD EXCUSE GIVEN) THEN NO FURTHER CREDIT WILL BE GIVEN.

RENEWAL OF SUBS.

RECENTLY WHEN SOMEONES SUBSCRIPTION TO D.U.M HAS EXPIRED I HAVE SENT THEM THE LATEST ANYWAY. THIS IS BACKFIRING. ONE IN PARTICULAR HAD 2 LETTERS WARNING THAT SUBS. WERE DUE THEN A LETTER WITH A FREE GRATIS ISSUE. AFTER A WHILE I PHONED HIM AND HE SAID: 'OH I WAS GOING TO DROP YOU A LINE. I DON'T USE THE ORIC MUCH NOW AND WASN'T GOING TO BOTHER' BLOODY CHARMING!

MY ROLE AS PROGRESS CHASER IS NOW CEASING. IF YOU DON'T PAY UP WHEN SUBS ARE DUE THEN YOU GET NAFF ALL!. IF THERE IS A PROBLEM AND YOU WANT TO RENEW AND CAN'T AFFORD IT FOR A FEW WEEKS THEN JUST DROP ME A LINE TO EXPLAIN.

SEDORIC - IS THERE A BUG!

RECENTLY ANOTHER CASE OF TRACK 14, SECTOR 01/02, FAULT 10 HAS CROPPED UP WITH A SEDORIC USER. IS IT THE POWER? IS IT SEDORIC? IS IT THE DIP SWITCH SETTINGS ON THE DRIVES? EVERYONE HAS THEIR OWN IDEA. THE MOST POPULAR BEING: "TURN IT OFF FOR A WHILE AND TRY AGAIN LATER". I INTEND TO GATHER ALL THAT HAS BEEN PRINTED ON THE SUBJECT AND WOULD WELCOME YOUR INPUT.

SECOND-HAND SOFTWARE

THE FOLLOWING CASSETTE SOFTWARE IS FOR SALE:

ORIC-CAD (TANSOFT) + MANUAL - 2.50

ORIC-MON (TANSOFT) + MANUAL - 3.00

ORIC-CALC (TANSOFT) + MANUAL - 3.00

all prices include postage. Send your monies to Dave Dick.

GRANDAD

NOW IN STOCK ARE A FEW COPIES OF 'GRANDAD' - THE QUILLED TEXT ADVENTURE FROM PAUL BAKER. THESE ARE 3.50 EACH.

ALTRI JOYSTICK INTERFACES

THESE INTERFACES ARE NOW COMPLETELY OUT OF STOCK AND NO MOR SUPPLIES ARE ENVISAGED.

I HAVE RECENTLY RECIEVED AN INTERFACE FROM FRANCE. WHEN I HAVE TRANSLATED THE INSTRUCTIONS I WILL GIVE IT A TRY AN REPORT FURTHER.

THE BACK PAGE

WELL THAT'S THE END OF ANOTHER ISSUE AND SO TO THE INDEX:-

P.1 - THE COVER from Jon Harrold P.2 - THE EDITORIAL
 P.3 - NEWS P.4/5 - READERS LETTERS
 P.6/7 - MACHINE CODE FOR THE ORIC STROS Pt 25 from Peter M Briggs
 P.8 - THE GANESTER P.9 - BITS 'n' BOBS
 P10/11 - AN ORIC EMULATOR from Nigel Blackford P12 - LET'S GET
 TECHNICAL
 P13 - BRIAN'S PUZZLE PAGE
 P14/15/16/17 - RAMROM 47 - Jon delves further and looks at some
 matters arising
 P18 - ORIC ENTHUSIASTS from Allan Whicker P19 - AN AFTERNOON IN
 HENEL
 P20/21 - MORE BITS 'n' BOBS P22 - DAVE'S 'A' TO 'Z'
 P23 - HARRY'S PAGE AS Mr. Peters gives a listing and shows how to get
 'started'
 P24 - THE TAILENDER P25 - THE INDEX and a special link at SOFIX.
